

HEC – SIMCO Awarded Prestigious  
Contract from Coal India's Northern  
Coalfields Limited

HEC - SIMCO is pleased to announce that it has been awarded a prestigious contract from Coal India's Northern Coalfields Limited (NCL) for the supply of 15 complete assemblies of 24m<sup>3</sup> class Dragline Buckets, Jewellery and GET.

NCL undertook a rigorous tender process in June 2016 from Bucket manufacturers across the globe and elected to award its largest Bucket purchase to the HEC – SIMCO alliance.

The highly Innovative and Productive SIMCO Dragline Bucket with the local manufacture and support from HEC was one of the key factors in NCL decision process.

Both companies are extremely excited about this new project with NCL and look forward to lifting Production and Maintenance reliability of its Bucket fleet for many years to come.
